- **Bluetooth**
  Download our APP from iOS or Android smart phone. Use your phone for keyless convenience and secure access

- **Mechanical Key Override**
  It can also be unlocked with a mechanical key

Application
Home Parcel Box

The modern e-commerce allows us to order anything from different websites, but we are always on duty during the delivery time, we worry about there might be a thief may steal our parcel when the deliveryman place it in front of our doors.

Parcel Lock Solution provides a safety and convenient parcel storage method, which allows deliveryman to open the parcel box by entering a one-time password into the mobile phone, and notice the consigner that the parcel has delivered. We can open our parcel box when we come home through a paired mobile phone.

Commercial Logistic Locker

Commercial Logistic Locker Solution provides a self-service parcel delivery service, customers can select any Locker location as their delivery address, and retrieve their orders at that location by entering a unique pick-up code on the mobile phone.

Customers can also return the orders through the Locker, the delivery man will retrieve the order back to the warehouse for inspection.
